Name: Dräger PSS 5000 DS Self-Contained Respirator

Code: 45219

Self-Contained Respirators - Dräger

Description

Combining advanced ergonomics with a wide range of configurable options, the Dräger PSS 5000 DS provides the user with the comfort and versatility to meet the demands of first responders whenever breathing protection is required. The PSS 5000 model has been designed to be not only comfortable but also extremely stable during use in harsh firefighting environments. Incorporating a rigid harness connection to a fixed-height back plate, advanced harness materials and a pivoting waist belt, the breathing apparatus remains in position regardless of the task in hand. The innovative harness "slide and lock" mechanism facilitates fast and simple harness and waist pad connection/removal from the back plate. The LDV, gauge and rescue hoses can now be routed over the left and/or right shoulders, allowing the breathing apparatus to be configured to any standard.

7-litres tank included.

The product is designed and manufactured to comply with the essential health and safety requirements of Directive 89/686/EEC, and to conform to the requirements of EN 137 and MED.
It is classified as PPE Cat. III.

Category III	Colours Black	Available Sizes
Quantity/Carton 1	Important Information Read carefully the instructions before wearing the PPE.	Recommended for Highly-contaminated environments, cleaning and pest control in casks, sewers and tunnels.
Dexterity	EC Standards EN 137 CE Class:2 MED 	Storage and cleaning
